

## NADC MEMBERSHIP

01

Membership offers access to resources, education, and quality improvement activities, while also connecting diabetes services nationwide through NADC advocacy. Joining NADC links passionate organisations committed to excellent diabetes service provision throughout Australia.

## NADC ACCREDITATION

02

The NADC accreditation for diabetes services is the only program of its kind to offer comprehensive, peer-reviewed diabetes-specific accreditation aimed at the improvement of quality and safety in diabetes care.

[nadc.net.au/nadcccreditation](http://nadc.net.au/nadcccreditation)

## CENTRE OF EXCELLENCE

03

The NADC Centre of Excellence Standards and Accreditation program offers services an opportunity to demonstrate that their organisation exceeds expectations set out by the Standards and operates as a Centre of Excellence (COE) in diabetes care in Australia.

[nadc.net.au/nadcccreditation](http://nadc.net.au/nadcccreditation)

## iHRFS ACCREDITATION

04

The objective of the NADC interdisciplinary Diabetes High Risk Foot Service Standards and Accreditation package is to assist Diabetes HRFSs to achieve quality patient care through improved interdisciplinary team-based care, including governance and centre structure, as well as providing opportunities for clinician education and research.

## TECH ACCREDITATION

05

The NADC technology standards and accreditation program has been developed to offer a comprehensive diabetes-specific set of Standards to guide and optimise service provision. The Standards set a benchmark for service delivery in diabetes technologies which is measured and assessed through a peer review accreditation process.

## HRFS DATABASE

06

To establish a national database, a minimum dataset was created by Australian HRFS clinicians. This dataset was transformed into user-friendly electronic forms, and support was offered to services adopting this benchmarking opportunity. This nationwide, world-class database enables service evaluation and resource allocation and supports quality improvement activities.

## NADC WEBINAR

07

The National Association of Diabetes Centres (NADC) in partnership with the Primary Care Diabetes Society of Australia (PCDSA) have created a series of lunchtime webinars for healthcare professionals that run fortnightly on Thursdays 12.30-1:15pm during school semesters.

[nadc.net.au/pcdwebinars](http://nadc.net.au/pcdwebinars)

## NDCC

08

The **National Diabetes Care Course** is an online interactive and comprehensive educational program providing healthcare professionals with current and evidence-based knowledge of diabetes clinical and self-care management.

[nadc.net.au/ndcc](http://nadc.net.au/ndcc)

## PERL

09

The **Patient Education Resource Library** is the optimal complement to diabetes care by providing access to an extensive library of patient education resources (fact sheets, videos, apps, websites) that can be seamlessly sent to people with diabetes via email or text.

[nadc.net.au/perl](http://nadc.net.au/perl)

## ADATS

10

**Australasian Diabetes Advancements and Technologies Summit (ADATS)** is the country's leading health professional meeting showcasing the latest advancements in diabetes technologies and how these advancements will impact service delivery.

[nadc.net.au/adats](http://nadc.net.au/adats)

## BPDC

11

The **Best Practice in Diabetes Care (BPDC)** meeting provides healthcare member services with an interactive and collaborative forum to network and discuss important issues affecting diabetes care and best practice.

[nadc.net.au/bpdc](http://nadc.net.au/bpdc)

## MODELS OF CARE (MOC)

12

The MOC is a practical toolkit containing information and case studies aimed at improving service access and health outcomes for people with diabetes. The MOC resource outlines best practice models of service delivery for successful integrated care and optimal diabetes management.

## ADCQR

13

Australian National Diabetes Audit has now transitioned to the **Australian Diabetes Clinical Quality Registry (ADCQR)**. The ADCQR relies on participating diabetes centres to collect data on patients with diabetes to monitor and report on the quality of care.

[nadc.net.au/adcqr](http://nadc.net.au/adcqr)

## NADC PODCAST

14

The **NADC Podcast** is a premier source for expert-driven dialogue and information in diabetes care. This podcast proudly presents a collection of recorded conference sessions and webinars, meticulously selected and adapted into audio format for your listening convenience.
